

We are pleased to offer our annual grant writing program designed to empower early- and mid-career SDRC members to strengthen their proposal development skills.

What sets this course apart?

- **Developed and Led by a Practicing Scientist** This intensive two-week course is led by Dr. Seung Kim, SDRC Director, who has extensive experience guiding researchers through the grant writing process.
- **Proven Track Record of Success:** Past participants have secured a significant number of NIH awards, including R01s, other R awards, and Foundation grants following completion of the course.
- **Focused Curriculum:** The four 90-minute sessions consider the essential elements of grant writing, with a particular emphasis on crafting compelling R01 proposals.
- **Interactive Learning:** Participants actively engage in reading and writing assignments designed to refine the scope and content of the specific aims. Group feedback sessions and one-on-one mentoring by Dr. Kim ensure personalized guidance and support.

Who should participate?

This course is ideal for early- and mid-career SDRC investigators seeking to enhance their grant writing skills and increase their competitiveness for NIH funding.

Ready to Join?

Space is limited to 4 participants for our in-person sessions. Preference given to SDRC members. Register now by emailing Jessica B. Sarthi (jsarthi@stanford.edu) to secure your spot.
