

Have you had acute pancreatitis?

You may be eligible to participate in a research study.

ABOUT THIS STUDY

The goal of this study is to determine if acute pancreatitis increases your risk for diabetes.

WHO CAN PARTICIPATE?

- Adults between 18 and 75 years old who have been diagnosed with acute pancreatitis within the past 90 days
- Adults with or without diabetes
- Must not have diagnosis of chronic pancreatitis, pancreatic tumors, or had prior pancreatic surgery

WHAT WILL PARTICIPANTS DO?

- Participants with diabetes prior to the study will attend one study visit
- Participants without diabetes prior to the study will participate in the study for up to five years
- Provide blood samples and undergo tests to detect diabetes at each study visit

Compensation is provided.
